CAREER SUMMARY

Highly motivated Computer Science student with a strong passion for frontend development. Skilled in building responsive and dynamic web interfaces using **HTML, CSS, and JavaScript**. Eager to apply my foundational knowledge and hands-on project experience to create intuitive user experiences in a challenging internship or entry-level role.

EDUCATION

Government Engineering College

B.tech in Computer Science Engineering

JEE (Main) 2023 – 79.23 Percentile

Guru Siddharth International School

Class 12th - 70.2%

Class 10th – 82.6%

Ajmer, Rajasthan

2023-2027

Beawar, Rajasthan

2022-2023

2020-2021

TECHNICAL SKILLS

Coding | Java, SQL | Debugging | DSA | C and C++ | HTML | Python |

WORK EXPERIENCE

Ex-intern | CDAC, Noida

March, 2025

It is the online training program on “Ethical Hacking and Penetration testing” is conducted by CDAC, Noida in march 2025. It is a generally virtual internship of Cyber Security which helps to learn about the security of system from the different malware in virtual world.

- Project – Building a Ransomware Simulator: Design, build & encrypts a test file and displays a ransom message on virtual machine. Check the report of a project on this link

CERTIFICATES

- Introduction to Python by ITM Edutech Training Pvt. Ltd. August, 2024
- Ethical Hacking and Penetration testing by CDAC, Noida March, 2025
- Yantra Quest : the national technology day 2025 Quiz by TDB May, 2025

PROJECTS

CabShare – Ride Sharing Android Application

Developed an Android application that enables users to share cab rides and split fares efficiently. The app includes features like trip posting and matching users traveling on similar routes. It was built using Java/Kotlin with Firebase for backend services and authentication. A simple and user-friendly interface was designed to ensure a smooth and seamless user experience.

QR Quishing Detection System

Developed a web-based security application that detects and analyses QR codes for potential phishing (quishing) attacks. The system scans QR codes, extracts embedded URLs, and evaluates them using security checks to identify suspicious or malicious links. Implemented features for URL validation, threat detection, and user alerts to help prevent phishing scams and improve user cybersecurity awareness.

Technologies Used: HTML, CSS, JavaScript, Python (if used), APIs, Cybersecurity Concepts
